

Ceiling ring system

1384060

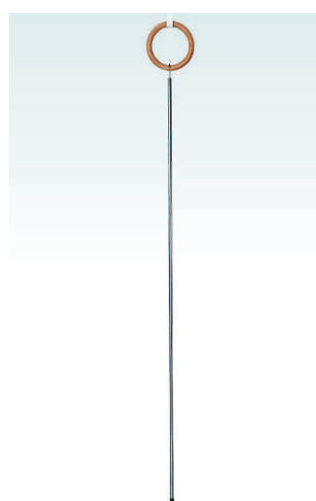

Ring system for permanent ceiling suspension. This model is identical to the competition ring frame 'Berlin' in terms of shock absorption and reduction of peak forces but without tensioning cables. Ideal for training centres, where there is not enough space for a ring frame or as a training apparatus over a pit.

Ceiling ringset 1289000

Fifty-fifty equipment 1403250

Hook 1760308

Technical data:

Reference number: 1384060
 Ring system for permanent ceiling suspension. This model offers the same advantages as Competition ring frame 1384034 in terms of shock absorption and reduction of peak forces. Without cables and rings. Ideal for training center's (excluding auxiliary constructions). Minimum height of hall required 600 cm.

Attention:

details of ceiling height and roof structure are required to determine the right type of fixation and the length of the inox cables.

Latest update: March 2016
