

Parallel bars 'Champion Stuttgart'

1403104

These Top Class SPIETH parallel bars 'Champion Stuttgart' comply with the latest FIG apparatus norms. The redesigned supports offer a superior degree of stability and rigidity and are provided with an improved 3-point locking mechanism. This system prevents accidental loosening of the uprights, thus offering the gymnast maximum security. The width adjustment is stepless for an individual setting. The high-frequency glued plywood rails are reinforced with 3 fibreglass inserts to provide the bars with the best strength and flexibility. The unique pretension in the rails compensates for the weight of the gymnast, resulting in horizontal rails during the exercise making the dynamics of the bars more predictable and therefore easier and safer for the gymnast. Nonmarking floor protectors are included.

3-point locking mechanism

Rail with 3 fibreglass inserts

Technical data:

Reference number: 1403104
 Height: adjustable from 160-210 cm with 5 cm increments
 Width: stepless adjustment from 41-61 cm
 Rails: high-frequency glued laminated and pretensioned plywood with 3 fibreglass inserts.
 Uprights: rigid steel columns with heavy cast supports, epoxy-coated and new 3-point locking mechanism; nickel-plated sliding tubes and cast-iron precision clamp heads and rail supports
 Space occupation: 350x166 cm (including rails)
 Original System Reuther

FIG certified competition model

Latest update: March 2016

Parallel bars 'Champion Stuttgart'

1403104

Superb characteristics

The present level of exercises requires very stable and rigid parallel bars. Especially for lateral entries, stability is essential. Vibrations disturb a gymnast and have to be reduced to a minimum in milliseconds. The FIG has laid down severe norms regarding these aspects. During the tests at the FIG Testing Institute, the SPIETH parallel bars 'Champion Stuttgart' passed the exam with flying colours. The 'Champion Stuttgart' is highly appreciated by gymnasts all around the world for competitions as well as for training.

Safety padding: 1566024

Extra soft crash mat: 1569601

Transport trolley: 1404016

Springboard 'Moscow 5': 1411704

Latest update: March 2016

FIG Apparatus Norms:

- Competition height: 200 cm
- Distance between rails: 42-52 cm

Related equipment:

- Safety padding (per piece): 1566024
- Transport trolley (per pair): 1404016
- Springboard 'Moscow 5': 1411704
- Extra soft crash mat: 1569601
