

Competition Springboard 'Moscow 5' (FIG Soft version)

1411704

Top competition springboard with 5 springs, FIG soft version, FIG certified. According to the latest FIG Apparatus Norms. Equipped with the revolutionary Whisper Spring System® (WSS) and available to gymnasts since the 2004 Athens Olympic Games. **The dynamic properties on the lower end of the springboard have been improved.** The carefully calculated positions of the conical of a tempered special high tech steel springs allow forward and backward vaults with a precise rebound on the entire surface of the springboard. Furthermore, this new generation springboard is also low-noise.

New high quality springs.

Improved dynamic properties over the entire surface.

Low noise springboard.

Technical details:

Reference number: 1411704
 Springs: 'Whisper Spring System®' (WSS), significantly less noisy than springboards with conventional springs. Equipped with 5 conical silver color coated springs, made of a tempered special high tech steel.
 Surface: Hybrid Carbon fiber sandwich, with 20 mm PP-180, a high density foam and covered with comfortable needle felt for long-lasting use. The lightweight top makes it fast responding with a reduced impact for the gymnasts.
 Lower part: High quality birch plywood, provided with new non-skid floor protectors guarantee the best stability. The large openings make the board easy to carry
 Height limitation: Different nylon straps guarantee the correct height and maintain the right curve of the board.
 Dimensions: Height 22 cm, width 60 cm, length 120 cm.
 Weight: 24,5 kg
 Rebound: From 340-400 mm.
 Arc: From 62-80 mm.
 Maximum forces: Less than 4000 N.
 Optional: For use in training halls, optional wheels are available.

Original System Reuther

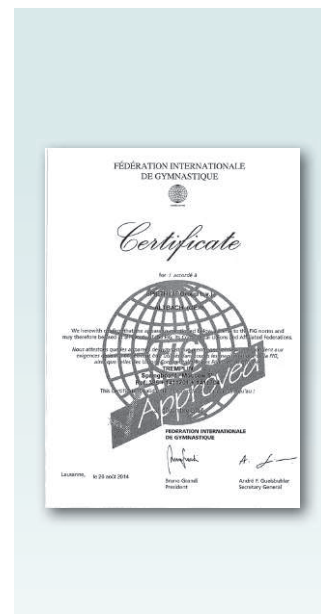

FIG certified competition model.

Latest update: March 2016
