

Competition Balance Beam 'Soft Touch'

1414210

Perfect grip and reduced risk of injuries. Meet the best of 2 worlds.

The revolutionary new SPIETH 'Soft Touch' technology features a unique combination of landings with a 'Soft Touch' and superior stability.

Measured impact forces of the current competition beam compared to the new Soft Touch beam show a decrease in impact forces of up to 50%. This way diminishing the possibility of injuries during repeated training. It also keeps its well-known stability to perform pirouettes, jumps and sideways landings. The hygroscopic paraskin cover ensures a perfect grip. Soft ergonomically shaped end caps provide additional comfort for the gymnast. A new innovative shape of the aluminium profile makes the balance beam appear optically wider, which makes it more comfortable for the gymnasts to train and compete on it.

The new competition model for upcoming events equipped by SPIETH.

Highlights:

- FIG-Certified competition model.
 - Unique toplayer technology combining shock absorbing 'Soft Touch' Landing with excellent stability.
 - Beam core made of extruded thick wall aluminium.
 - Cover made of skin-friendly, hygroscopic paraskin.
 - Comfortable soft end caps.
 - Rubber leg caps for stability and to prevent floor damage.
 - Heavy-duty epoxy-coated steel base.
 - Easy height adjustment.
- Original System Reuther.

Technical data:

Reference number: 1414210.
 Height: Adjustable from 75-125 cm, with 5 cm increments.
 Length beam: 500 cm.
 Width beam: 10 cm (working area).
 Width legs: 112 cm.
 Mat set: fits to the existing SPIETH mat set (code 1565842).

New 'Soft Touch' technology
